

HARSH CHOUDHARY

work.harshchoudhary.it@gmail.com — +91 6395993566 — LinkedIn — GitHub

Profile

Backend Developer with experience building scalable REST APIs using Java, Spring Boot, Node.js, and Express.js. Worked on production-grade systems involving role-based access control, secure authentication, payment integration, and containerized deployments. Hands-on experience with PostgreSQL, MySQL, Docker, and AWS, with a strong focus on clean architecture, testing, and backend reliability.

Education

Indian Institute of Information Technology Guwahati

B.Tech, CGPA: 8.25

Nov 2022 – Present

Guwahati, Assam

Technical Skills

Languages: Java, C++, JavaScript

Frameworks: Spring Boot, Node.js, Express.js, REST APIs

Databases: PostgreSQL, MySQL, MongoDB

Platforms: AWS, Firebase Auth

Tools: GitHub, Docker, Postman, VS Code

Professional Experience

LivZone Design

Backend Developer Intern

May 2025 – Jul 2025

- Developed and maintained 20+ REST APIs using Node.js and Express for core backend features.
- Normalized MySQL schemas to eliminate redundant data and improve storage efficiency.
- Optimized API JSON responses, reducing payload size by ~20%.
- Implemented unit tests with mocking frameworks, achieving ~85% branch coverage.

Projects

AirBnb Backend API – Accommodation Booking Platform

Jan 2026

- Built 17 Spring Boot REST APIs for authentication, hotel/room management, search, booking, and payments.
- Implemented JWT-based RBAC for 2 roles (GUEST, HOTEL_MANAGER) with secure endpoint authorization.
- Designed date-based inventory and pricing logic with webhook-backed Stripe payment confirmation.

GitHub — *Java, Spring Boot, Spring Security, JWT, PostgreSQL, REST APIs*

Expense Tracker – Personal Finance Platform

Sep 2025

- Architected a service-oriented finance tracker with 3 backend services (auth, transactions, notifications).
- Developed REST APIs with pagination (10 records/page), filtering, multi-user data isolation, and 20+ expense categories.
- Integrated OCR-based receipt and bank-statement processing, reducing manual data entry by ~90%.

GitHub — *Node.js, Express.js, MongoDB, REST APIs, Docker, Nginx*

AirAware – Health Awareness Platform

Apr 2025

- Engineered an air quality monitoring system mapping user locations to real-time AQI data.
- Designed SOA with 6 Dockerized services using Kafka and NGINX as API gateway.
- Implemented real-time health alerts and an SVM-based risk model (~80% accuracy) with Razorpay integration.

GitHub — *Spring Boot, REST APIs, Docker, Nginx, Machine Learning, React*

Certifications

The Web Developer Bootcamp 2024 — Hands-on full-stack training in JavaScript, React, Node.js, Express, MongoDB, REST APIs, and authentication. Certificate

Achievements

- Knight Badge on LeetCode through consistent participation in coding contests. LeetCode
- Solved 800+ algorithmic problems covering arrays, trees, graphs, and dynamic programming. LeetCode
